

JAMNA AUTO INDUSTRIES LIMITED

Reuse and Recycling Policy

Jamna Auto Industries Limited (“the Company”) is committed to advancing sustainability by reducing waste, maximizing resource recovery, and promoting circular economy practices.

The Company has set a target to recycle 100% of the waste generated by 2030 and is committed to minimizing landfill or incineration by promoting asset reutilization, refurbishment, and environmentally responsible disposal. The policy is applicable to all manufacturing plants of the Company and its subsidiaries.

Objectives

- Minimize waste generation at source.
- Reuse and recycle materials to optimize resource efficiency.
- Comply with all applicable environmental laws and standards.
- Support the Company’s long-term ESG commitments.

Policy Commitments

- **Waste Management Procedure:**
 - (a) A comprehensive inventory all types of waste generated within the plants shall be maintained. Each waste type will be assessed for its reusability, recyclability and disposal method.
 - (b) Each waste shall be identified at point of generation according to defined waste categories. Waste shall be segregated in color-coded and labelled bins or containers to ensure proper handling.
 - (c) Segregated waste will be stored in designated storage areas. Waste will be re-used within the process or other suitable areas or re-cycled through internal methods or authorized external vendors or disposed safely and in compliance with applicable laws.
- **Waste Minimization:** Streamline manufacturing processes to eliminate inefficiencies, and reduce material waste. Prioritize the use of recyclable and biodegradable materials in production and packaging to minimize environmental impact.
- **Reuse:** Encourage reuse of packaging, office materials, production residues, and surplus items, subject to quality checks.
- **Recycling:** Implement waste segregation practices and collaborate with authorized vendors to ensure proper recycling of materials.
- **Refurbishment & Parts Harvesting:** Extend equipment/product lifecycle through refurbishment, reconfiguration, and harvesting of reusable parts.
- **Compliance & Engagement:** Adhere to all environmental regulations and work with suppliers, vendors, and recycling partners to promote sustainable practices.

Monitoring & Review

Policy will undergo a quarterly review and be updated according to regulatory changes, technological advances, and industry best practices.
