

Schaeffler multi-purpose grease

Schaeffler India has launched high performance multi-purpose premium grease, XTRA3, which has been specially formulated and designed to increase the service life of bearings operating in harsh and demanding work environments. The lithium-soap thickened, mineral oil-based grease is scientifically engineered and tested extensively at extreme temperatures under harshest conditions at Schaeffler laboratory in Germany, and is FE8 and FE9 certified making it extremely

reliable for demanding applications. Characterized by excellent water-

resistance, excellent corrosion-resistance, low-evaporation, and a wide functional temperature range (-10 to 110°C), the XTRA3 multi-purpose premium gease for the industrial and automotive aftermarket is designed in Germany to meet the unique requirements of maintenance and repair work of rolling bearings. It readily available in various pack sizes from a 100 gms pouch to 20 kg bucket across India though registered retailers and authorised distributors.

JAI launches trailer suspension components

Jamna Auto Industries Ltd., launched trailer suspension components at Auto Technika 2019. Held at Bangalore International Exhibition Centre (BIEC), at the international exhibition on vehicles, auto components, spare parts, technology and allied industries, the company reiterated its commitment to offer technologically superior and high-quality products to customers.

The company did so by launching a range of trailer suspension components including front bracket assembly, middle bracket with equaliser, rear bracket assembly, axle end spring MTG bracket, axle end ROD U-Bolt MTG bracket, spring locating TOP bracket, torque rod and U-Bolt. in the first edition of Auto Technika 2019.
